Pie Chart

Bubble Chart

Bar Chart

Network Diagram

Video Embedded/ Animation

Shape Chart

Dot Plot

Filter

Map → Essential for DV2.

~~Bar~~

Network diagram → Might not be very useful

Dot Plot → Maybe connect to line chart

Bar Chart

Line "

Shape "

Bubble :

Could use to show history OR projection of future

Categorise

Map & Video/Animation could work in tandem, not sure how though.

Combine & Refine

Video/Ani

Text

Summarise and question

Will a video be necessary, or even possible to use?

What is the ideal dataset?

What kind of map will best show ideal dataset?

How long will it take to make?

Components / Operations

Map → proportional symbol map, cylinder projection, showing damage to coral reefs. Tooltip

Bar Chart → location of reef vs ocean temp. Text to explain.

Line chart → Time vs "dead coral"

Comic Strip Genre

Pro & Cons

Pros

- Simple & easy design.
- Easy to follow

Cons

- Prop. symbol could get messy if data isn't properly cleaned.

Map → prop. symbol

Bar Chart

Text Box

Image OR gif

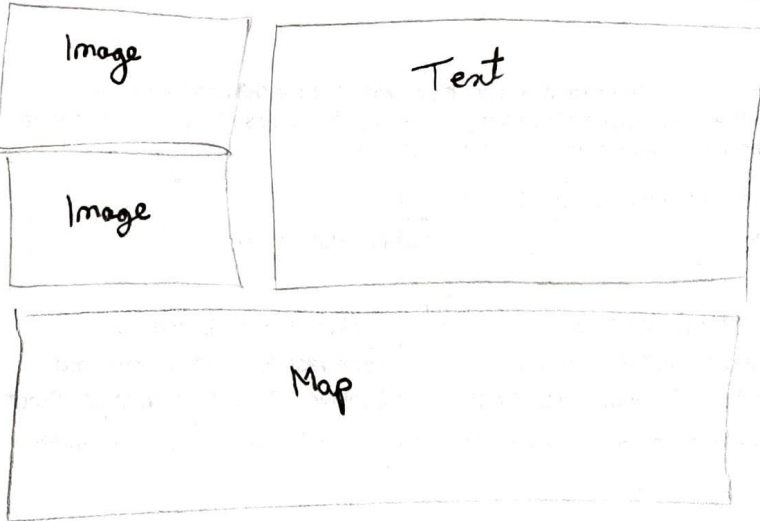

Line Chart

Meta-data

Parti / Focus

Tooltip can show Temperature of water, % damage, other data too.

Parti / Focus

Bubbleplot tool tip can show Temp, contaminants, % change of Temp, other data too.
Might choose to use colours that resemble bleaching of coral reefs.

Sheet 234

Name Anya Nayak

Date 4/10/25

Title

Description

Components / Operations

Magazine style

Map → bin map, darker colour
⇒ more bleaching
Tooltip again for extra data

Dot plot → Region vs % damage

Bubble → Ocean Temp

Pro & Cons

Pros

Bin map might be the best way to show bleaching.

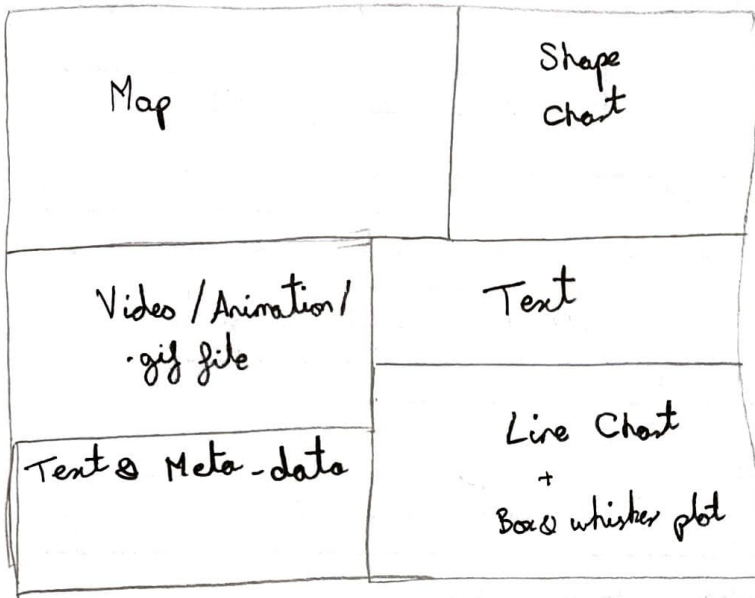

Image good to break-up data.

Cons

Too much text?

Not enough vis

Title

Part / Focus Shape Chart

Ocean

Year

→ Ideal ocean temp. to prevent bleaching.

Sheet 2,3,4

Name Anya Nayak

Date

6/10/2025

Title

Description

Components / Operations

Partitioned poster

- Map will have annotations,
- Shape chart will be of Ocean Temp in specific year (Can choose ocean & year), thermometer shape.
- BSW
- ~~line~~ chart to show bleaching, temperature (low & high), line chart to show % bleaching

Pro & Cons

Pros:

- Complexity
- Easy on the eyes

Cons:

Complexity for myself.
Map too small maybe?

Box & whisker
plot

Text #2

Bar Chart

Source, meta-data

Part / Focus

- Dotted line / Annotation to show what
- Temp should be ideally for no bleaching
- Tooltip to show exact temp along w Turbidity.
- Annotation to explain what Turbidity is.

Sheet 5

Name Anya Nayak

Date 9/10/25

Title

Description

Components / Operations

Partitioned Poster

- Animation will have coral reef, will transition from healthy to bleached.
- Map → Choropleth map, darker = more bleaching, symbol map could work.
- Line, B&W chart → Line to show % bleaching, B&W to show max/min Temp, maybe just box.
- Bar Chart → Ocean Temp vs year

Details

- Bar Chart & B&W/Line chart will be colour of coral OR bleached coral.
- Text #1 focus on bleaching disaster
- Text #2 focus on how to solve/improve.
